

ARCHITECTURAL REVIEW COMMITTEE

The Architectural Review Committee works under the direction of the Church Administrator. We provide assistance in identifying areas of the church in need of maintenance, renovations or simple updates. Many times the maintenance issues that arise from the facilities the size of Woodmont are more than the Building and Maintenance Committee can manage. We work with the chairman of that committee along with the Building Superintendent to coordinate projects based on need, expense and time involved.

The projects we undertake can range from choosing paint colors to renovating a certain area of the church. We help with door and window replacement, flooring and signage as well as replacing furnishings and improving storage. This committee helps keep our facilities maintained and in good working condition. We believe we have a responsibility to take care of God's house just like we would our own.

We welcome any help with this ministry. Many of our projects can be very time consuming and involve much research. We want to make sure we are using our budgeted money wisely and that any money spent reflects careful planning.
