

MULTI MEDIA MINISTRY

Visual Media Tech

Purpose/Duties

Using a prepared program order, the visual media tech presents song slides, PowerPoints, and videos on the Worship Center screens for the morning and evening services. The Tech will learn how to setup and use the presentation software (Easy Worship). They will also learn the basics of switching between various media inputs and outputs in our video system.

Time Commitment

One Sunday per month and be available for both the morning and evening service for your week. If we have enough volunteers, this could be reduced to one Sunday every two months.

Skills Required

- Think well on the fly
- Computer savvy
- Razor sharp focus
- Have a pulse

Training Date: TBD

We have people on a rotation currently and have found it is easier to teach new volunteers during an active service preferably in the evening.
